Factor Clusters: Re-Balanced Slide Estimates

Normalized Business Proportions (34 Factors across 8 Clusters • Sum = Exactly 100%)

Cluster	Cluster Name	Factors	Weight	Key Examples & Scope
A	**Store Physical Scale & Capacity**	6	**23%**	Sales area (m²), cash registers, store format archetype
B	**Municipal Demographics & Density**	3	**16%**	Municipal population, land surface, density per km²
C	**Territorial Wealth & Economics**	2	**7%**	Municipal GDP, GDP per capita (purchasing power)
D	**Geographic Positioning**	6	**14%**	Lat/Long, CAP postal code, Provincia, Regione, Nielsen area
E	**Spatial Network & Competitive Density**	6	**15%**	Nearest Coripet RVM (km), 5km count, competing grocery stores
F	**Hardware Technology**	2	**8%**	Machine model (TipoMacchina), supplier, compaction speed
G	**Retail Brand & Buying Alliance**	2	**14%**	Standardized banner, commercial buying group
H	**Temporal & Seasonality Cycles**	7	**3%**	Weekend/holiday flags, DOW & month sin/cos, quarter
Total	**Operational Framework Total**	**34**	**100%**	**Exact Mathematical Check (23+16+7+14+15+8+14+3 = 100%)**

Note: Normalized from original presentation draft (~127% raw estimates) by incorporating temporal seasonality (3%) and re-scaling all clusters proportionally to sum to exactly 100%.
